

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter the researcher gives the conclusion and the suggestion. The researcher included the conclusion in explained the entire series series to know results of the research, this part also as aproof of the research that have complecated by the researcher. The researcher also provided suggestions as a reference for further research of for parties in need.

A. CONCLUSION

The purpose this research showed the problems in English learning during the covid-19 pandemic at SMPN 4 Putussibau After getting the results of research, the next step is to provided conclusion from the research that has been carried out. Conclusions are very important, because it can described or explained the end of the research. An analysis of English learning during the covid-19 pandemic at SMPN 4 Putussibau began from the implementation of regulations from the education departement that required to students to study from home. The students are learning used WhatsApp from home. They are using WhatApp to send their task and the teacher additionally using WhatsApp to share the matery. Furthermore, the teacher is used learning media as books, motion pictures of studying and application of gaining knowledge of. further, the teacher using book as the learning media additionally the use of WhatsApp or

different social media to shared the materials and assignments English lesson. The students are enjoy when the trainer the use of video of studying media. If the teacher simply the usage of book because the learning media, the students are bored and they did not longer revel in in studying English. Not all students have communication tools (android) the teacher now does not only share materials and assignments through social media and some are directly distributed to students.

Students in SMPN 4 Putussibau have difficulty using WhatsApp as the media that used in English learning during the covid-19 pandemic. Their difficult to learn from home because they do not access the internet well. The students' lack of information to done their assignment and get the materials. The student also experienced a decrease in English lesson value during the covid-19 pandemic, because it was not directly supervised by teacher.

B. SUGGESTION

At the end of the findings or resesarch results, the researcher would like to provide suggesstions as below:

1. For The Students of SMPN 4 Putussibau

Students of SMPN 4 Putussibau should learn more English at home by taking advantage of android, for example looking for vocabulary in English by searching on google, youtube and the other applications. Students must be creative in learning English

during the covid-19 pandemic by using text books and android as a means of learning at home.

2. For the English Teachers

English teacher should give an explanation according to the time of learning from home, so that the students do not have difficulty understanding the material and doing assignment from home. Teacher must have various strategies or methods to improve students' ability in learning English during the covid-19 pandemic. In addition, teacher should familiarize students using various application of learning English.

3. For the Next Researchers

Researcher who carried out similar research in the future, especially those related to analyzing English learning during the covid-19 pandemic. Researcher can pay more attention that the obstacles in English learning from home. For example, researcher can analyze the effect of student confuse learning English from home.
